

## Document reader Regula 70X8

**The full-page document reader is intended for integration into automatic border security kiosks, e-Gates, etc.**

**Automatic reading and authenticity verification of passports, IDs, visas, driver's licenses and other identification documents.**

**Optical character recognition, reading of barcodes, RFID chips.**

The document reader is to be integrated into automatic border security kiosks and other data acquisition systems. The device is constructed in metal body with a plastic top. The level of protection provided by the device body in the area available to the user (glass) corresponds to IP41 class. The device is connected to a PC via a USB cable. No moving parts. Reliable, convenient and easy-to-use.

The device allows capturing images in white, infrared, ultraviolet and coaxial lights. Certain models are equipped with modules for reading RFID chips. The device is supplied with software development kit (SDK) for easy integration into existing end-user systems.

## Functionality

- Capturing and processing images
  - supported document formats
    - ID-1
    - ID-2
    - ID-3
    - other documents with maximum size 90×130 mm
  - automatic detection of a document in a scanning zone
  - automatic scanning after document detection
  - elimination of glare from laminate and holograms in white and IR light
  - compensation of external light hitting during image capture in ultraviolet light (*Smart UV*)
  - automatic selection of UV illumination intensity according to the document type
  - search and cropping of a document image from a general image
- The MRZ detection and recognition
- Recognition and reading of 1D and 2D barcodes
- Automatic recognition of a document type
- Processing graphic fields
- OCR of the visual zone
- Reading RFID tags
- Analyzing and comparing text data
- Automatic authenticity verification of a document

## Operation

1. The optical reader automatically detects a document in the scanning area of the device.
2. Document images are captured in different illumination modes. At the same time data is read from RFID tags and smart cards.
3. **Regula Document Reader SDK** processes data.
4. Results of the verification are ready for further use.

## Application

- Automatic systems for authenticity verification of documents: kiosks, e-Gates etc.

## Delivery Set

- **Regula Document Reader SDK**
- USB cable for connecting the reader to a PC

Functionality		Model

## Optical document reader

- Field of view, mm — 90×130: full passport page
- Sensor:
  - type — CMOS
  - colour model — RGB
  - colour depth, bit — 24

Megapixels	1	3,1
Resolution, ppi	180	400
Frame size, pixels	1024×768	2048×1536

## RFID-reader for Regula 7028.XXX

- Supported standards — ISO 14443: RFID tags of type A and B
- PC/SC protocol support
- Data exchange rate, Kbaud — 106, 212, 424, 848
- Reading an RFID tag regardless of its position in a document
- Anti-collision: reading an RFID tag according to the MRZ

## Technical specifications

- Dimensions (length×width×height), mm:
  - **7008.XXX** — 138×202×211
  - **7028.XXX** — 196×202×211
- Weight, kg:
  - **7008.XXX** — 1,6
  - **7028.XXX** — 1,8
- Power supply voltage, V — 5
- Supply current, A, max — 1,5

## Document reader software development kit (SDK)

SDK (**Full**) consists of three modules:

- Basic – supplied together with a device by default
- VizOCR – reading textual fields from a document page
- AAC – automatic authenticity control

VizOCR and AAC modules are optional and used to extend the functionality of Basic module.

Updates for SDK are provided regularly. Basic module has unlimited support. VizOCR and AAC are updated on subscription basis.
